ARECA LEAF PLATES

SINCE 2021

ABOUT US

Retree is an eco-conscious company that was started in 2021 with a vision to reduce pollution and increase nature by making eco-friendly plates.

It was founded by two college friends who were committed to creating sustainable and biodegradable products.

Retree has now expanded its reach and exports to several countries including USA, UK, Australia, Thailand, and UAE.

Our timely production ensures that you get the eco-friendly products you need when you need them.

Our packaging is designed to keep your products safe and secure during shipping, while also being environmentally friendly.

Our eco-friendly approach means that our products are made from sustainable materials and are biodegradable.

Our certifications, including Anaerobic Plate Count – APC35C, ASTM D-6400, and ASTM D-6866, give you confidence in the quality and environmental sustainability of our products.

CLEAN PLATES

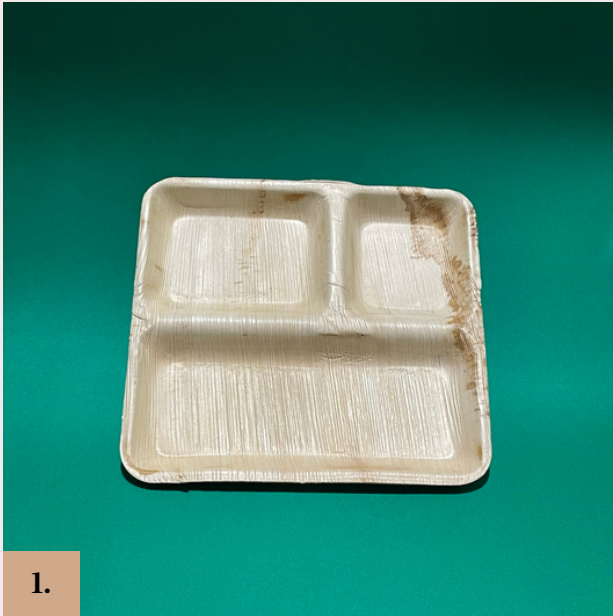

Cleaning the leaves properly is crucial for ensuring the quality output of Areca Leaf Plate manufacturing.

Proper cleaning removes any dirt, debris, or impurities from the leaves, ensuring that only the highest quality leaves are used in the manufacturing process.

QUALITY
100%

MORE SHAPES

At our Areca Leaf Plate manufacturing facility, we have the ability to create custom shapes and sizes for our clients. Our skilled craftsmen use precision tools and techniques to create plates that meet your unique specifications. With our custom Areca Leaf Plates, you can showcase your brand or create a unique look for your event or business.
